Personal Profile

Passionate **BBIT student** with expertise in **React, TypeScript, and MERN stack development**. Experienced in **leading tech projects** and **delivering user-centered solutions**. Motivated **AI/ML enthusiast** driven by **innovation, problem-solving**, and **continuous professional growth**.

Skills

Technical Skills

- **Languages & Frameworks:** JavaScript, React, Tailwind CSS, Node.js, Express.js, MongoDB, Python, C, C++, PHP, Java
- **Web & Mobile Development:** Responsive UI, REST APIs, React Native, Android (Java/XML)
- **Networking & Cybersecurity:** Networking fundamentals, Linux basics, cybersecurity principles
- **Tools & Cloud:** Git/GitHub, VS Code, cloud concepts

Soft Skills: Communication, Leadership, Problem-Solving, Planning & Organization

Projects

RangiCraft – Web Application (React, Node.js, Tailwind) | Personal Fullstack Project

- Built a responsive fullstack app with reusable components and clean UI
- Implemented backend APIs for dynamic data and user interactions
- Frontend: rangi-craft-frontend.vercel.app | Backend: rangi-craft-backend.vercel.app

Bantu Couture – Fashion Website (React, Tailwind) | Frontend Project

- Developed a responsive e-commerce fashion site with product catalog and filtering
- Focused on intuitive shopping experience and interactive UI
- Frontend: https://bantucouturefashion.vercel.app/

PesaTrack – Web Application (MERN) | Fullstack Project

- Built a finance tracking app with dynamic dashboards and secure interactions
- Integrated REST APIs for real-time data management

Energy Awareness SMS Platform – Hackathon Project | 1st Place (2025)

- Led a team to create SMS alerts for energy efficiency
- Designed backend logic, system flow, and UI for easy usage

MoyoCheck – Mental Wellness App | Concept Project

- Designed an app to help students track emotional well-being
- Implemented mood tracking and insights with user-friendly, empathetic UX

Experience

Frontend Developer (Projects & Team Lead)
Self-driven / Academic Projects | 2024 – Present

- Built and maintained responsive web applications using React and TypeScript
- Integrated REST APIs and handled dynamic data rendering
- Collaborated in team environments and managed development tasks
- Focused on performance optimization and clean code practices

Education

Bachelor of Business Information Technology (BBIT)
Dedan Kimathi University Of Technology
2023 – Present

Kenya Certificate of Secondary Education (KCSE)
Karima Girls High School
2019 – 2022 | B+ (Plus)

Achievements & Leadership

- Class Representative, BBIT – Dedan Kimathi University of Technology (2023 – Present)
- IT Student Leader Delegate (2025/2026)
- GDG Cloud Computing Lead – Organized and guided sessions on cloud and developer tools
- Primary School President & Njiru Sub-County Chairperson (2017/2018)
- 1st Place – Energy Awareness SMS Hackathon (2025)
- Participant – ESA Women in Engineering Summit Hackathon on sustainable urban solutions
- Power Learn Project (PLP) – Graduated as a Software Developer (2025)

Certifications & Courses

- Linux Essentials – Fundamentals of Linux operating system
- Networking Essentials – Basics of networking concepts and configurations
- I2B (Idea to Business) Training – Startup and business idea development
- Moringa AI Training – Introduction to AI principles and applications
- PLP Certificate of Achievement – Software development program completion
- Ajira Women-Only Gig – Digital work skills for women
- Ajira Digital Marketing – Training in digital marketing skills
- First Aid at Work – St John Ambulance
- Peer Counseling – Identifying social/psychological/academic needs among peers
- Student Leadership Training – Effective student leadership and collaboration

Interests

- Software development, AI, Machine Learning, and cloud technologies
- Community service and mental health advocacy
- Sustainability and women empowerment in tech
- Public speaking, writing, and mentoring peers
- Choir member, choir trainer, piano/keyboard, and guitar studies
